intelligent aftermarket solutions

A Trusted Aviation Aftermarket Partner

Broadwing Aviation is a supplier of aftermarket aircraft components and supply-chain services to airlines, air transportation operators and aircraft maintenance organizations around the world. We focus on solving problems in the customer's supply-chain by providing a low cost, high quality solution for rotatable assets.

Our "ready to ship" inventory consists of strategic rotables for the MD80, B737 - 3/4/500, B757, B767 and A320 aircraft.

Innovative, High-Quality, Aftermarket Rotable Part Specialists

Broadwing has a resourceful and experienced team of aftermarket parts and asset management specialists who are focused on solving customer problems. Our role goes beyond that of a traditional aftermarket supplier. We provide innovative services for our customers and partners such as:

- **inventory management**
- **surplus sales**
- **repair management**
- **sale leaseback financing**

The **Broadwing** team has been serving the leading airlines of the world since 2001. Founded on the principles of integrity and quality **Broadwing** has become a trusted and valued partner in the aviation industry.

- **ASA certified**
- **Provide 24/7 service and availability**
- **All components have full trace and documentation**
